HARUN RASHID

SOFTWARE & SYSTEMS ENGINEER

Email: hr1349891@gmail.com | Location: Dhaka, Bangladesh | Portfolio: /developer

ENGINEERING PROFILE

Disciplined software & systems engineer focused on architecting resilient, high-concurrency systems, modern computational workflows, and scalable full-stack web applications with high technical precision. Experienced in distributed backends, RESTful service layers, and interactive GPU-accelerated interfaces.

TECHNICAL PROFICIENCIES

Systems & Architecture:	Distributed APIs, Microservices, Authentication (JWT), Database Modeling
Languages & Runtimes:	Python, TypeScript, JavaScript, SQL, HTML5/CSS3
Frameworks & Tools:	Next.js, React, Flask, SQLAlchemy, Tailwind CSS, Framer Motion
Databases & Infra:	PostgreSQL, SQLite, Docker, Git / GitHub, Linux Environments

FEATURED ENGINEERING PROJECTS

Distributed Cloud Architecture & API Core 2026

High-concurrency RESTful service layer with containerized microservices and automated workflows.

Enterprise Management & Kitchen POS Platform 2025

Scalable real-time management system with state synchronisation, database transactions, and cloud ordering.

Interactive Engineering Portfolio Experience 2026

Editorial 3D perspective scroll, GPU-accelerated micro-animations, and full admin content management.

EDUCATION & CREDENTIALS

Bachelor of Science in Engineering Graduated

Core Coursework: Computer Science, Software Engineering, Systems Architecture & Numerical Computing
